

Plastic foam recycling machine

1. Plastic foam recycling machine Data

Machine Named: recycling machines for EPS/XPS, plastic recycling machine, PS

Recycling machine.

Type of production line/生产线型号: KM250-125

Processing materials (加工物料): XPS Foam board, XPS POWDER, EPS panel

Output/生产量: 250kg/hr-350kg/hr

Total power /总功率: 150kw

2. Plastic foam recycling machine Contain

2.1 Crusher Type :800

1 Fast breaking characteristics, the diameter $\leq 10\text{cm}$.

2 high quality and wear-resistant cutter design,

2.2 First extruder

Type KM250: Suitable for broken blocks, PS powder EPS XPS etc.

Type KM250H: increases the forced feeding function is more suitable for powder, fine particles, small bulk material which very light weight

2.3 Second Extruder

Type: KM125

1 Optimization of screw design

2 stable and controllable extrusion effect

2.4 Filter

screen changer : Electric exchange

1 Economical and durable Heat treatment material changer

2 Production of professional manufacturers

2.5 Mould

Carbon steel material Standard pore number : 19 holes and 23holes

2.6 Pelletizer

Type: 180 Alloy blade, High quality and wear-resistant

2.7 Electric control cabinet:

Temperature control system: 3 groups; all use the knob temperature setting switch, the digital temperature control meter, the resistance temperature measuring element
